Isuzu Engine Parts

Isuzu engine parts, Isuzu engine components, Isuzu industrial diesel engine parts

Isuzu Industrial engine parts

We carry a selection of Isuzu parts in inventory, but being a Dealer, we have access to all the warehouses across North America! Mark is our resident engine parts Guru, so have your model, serial number along with the spec, year and vehicle the engine is in. This pertains to all engine brands, John Deere, Isuzu, Detroit Diesel.

Electrical Parts

By providing our customers with the latest technology and products, our goal is that we can be a full service provider in the diesel and electrical market place. Control Switch International Inc. has what you need to complete any electrical project your company produces. From terminal strips, wire ties to large rotary switches Csii is the soup to nuts in providing electrical switches. In house engineering and custom panel manufacturing are available to all customers.

We can fulfill your needs of electronic governors and speed switches. Woodward and Governors of America are two of the finest companies that provide these items to keep your power generating equipment operating efficiently.

Power Take Offs

NACD manufactures PTO assemblies from the small 7 1/8” and 7 7/8” housing bore applications with 4.5” and 5.5” oil bath or dry clutches suitable for horizontal shaft gas and diesel engines used in the construction industry for pumps, compressors, mixers, blowers, generators and other applications where a cut-off clutch is required, up to the larger housing sizes SAE 6 through SAE 1 with bronze-bearing and ball-bearing released over-center clutch sizes ranging from 6.5” single, 10” single, 11.5” single and double, 14” single, double, and triple plates. We have various pilot bearing configurations to suit different engines. All PTO assemblies and clutches are assembled at our Illinois facility and undergo a series of inspections from assembly right down to the packaging operation. NACD is a well-known and highly respected manufacturer for OEM and engine distributors, and we maintain a growing, global NACD Distribution base that inventories and services NACD PTO products. The latest entry to the NACD PTO Family is our Spring-Loaded PTO utilizing an automotive-style clutch to fit gas and diesel engines with conventional truck flywheels for use with brush chipper and irrigation applications. This new series PTO may be ordered either with non-asbestos woven disc, or copper-metallic disc for use in certain diesel engine applications and is suitable for many other work environments and tasks.

Diesel Engine Parts
